I loved watching this all the way through. If I didn't know it was an April Fools video I would have believed it because of the time and effort that went into it. From creating product packaging to documenting the process of marking the bullets-you completely sold it for me. The production overall was spot on from lighting to framing and even the script. Excellent campaign.

This piece was so beautifully shot. Loved the strategy of telling the story through the elderly woman and the child. Child was perfect talent choice. Loved the editing. This was the first submission we watched of 80 entries. It remained my fave throughout. Prepro work was impressive along with cinematography.

Powerful storytelling. We're incredibly impressed with the producer of this piece. Well-organized with an easy flow. You really brought us into this man's life. We appreciated the scenes with the care and vintage props too. Great job pulling out some very poignant moments of the story and creating a captivating, memorable piece.

In our industry, we can achieve almost anything in post, but the striking aspect of this spot is the props and the way they were deployed. So much work to make a couple seconds of screen time won't be appreciated by most but it was by me.

Best of Show
